Firm Overview: Propensiones International Law Firm

Propensiones Abogados Internacional is a duly constituted law firm, registered under NIT 901409813-7, with in excess of ten years of experience practising law at both the national and international levels.

Our firm is dedicated to providing comprehensive, strategic, and top-tier legal solutions in both commercial matters and the defence of individual rights.

We also administer our own foundation, Fundación Attlas Org, which is registered in the United Nations Department of Economic and Social Affairs (UN DESA) database. Through this organisation, we conduct social initiatives funded from our own resources, focused on improving the welfare of senior citizens, children, and animals. These endeavours further affirm our steadfast commitment to social responsibility and solidarity.

- Certificate of Title / Chain of Ownership
- Security Certificate
- Letter of Referral to Banks and Insurers + Risk Matrix
- Assignment of Rights
- Endorsement and Assignment to the Final Creditor

3

Technical Asset Analysis

We offer specialized technical analysis of historical, exotic, biblical, and patrimonial assets, carried out by expert personnel and using verification tools such as molecular microscopes, spectrometer, professional magnifying lenses, ultraviolet lights, reaction and contact tests, and ionized magnets, allowing for precise and non-invasive authentication and certification of assets.

Each process results in technical reports with legal and commercial validity, ensuring transparency, traceability, and full confidence in purchase, sale, custody, or negotiation operations.

4

Global Elite Asset Certification Program

We have consolidated a Program of Wholesale Providers and Guilds of Strategic and Historical Assets, an exclusive system already underway that guarantees international recognition, legal legitimacy, and global strategic support.

Clients who join gain access to priority certifications, preferential international agreements, and a closed elite network where their assets are recognized as legitimate collateral before governments, multinationals, and high-value markets.

This is not a future promise: it is a living and current program that provides immediate competitive advantage in the new financial era.

5 Global Logistics

We design and coordinate international logistics for the transportation and safekeeping of assets, ensuring their legal protection and successful delivery.
